To Whom It May Concern

ECOsysteMS was employed by SKYCITY Auckland to implement their Continuous Energy Optimisation (CEO) process at SKYCITY Main Site between 2008 and 2010. This process involved a particularly detailed and methodical review of 68 AHU in our Casino and Hotel.

As a result of the programme, ECOsystems identified a raft of opportunities to reduce energy use. They also identified inefficiencies and then developed innovative control strategies to overcome some of the unique realities of such a large and diverse site where we have gaming halls, gaming rooms, multiple kitchens and restaurants, diverse offices, hotel rooms and a very large underground car park.

We are currently in the process of working through the issues identified and implementation. This process has identified unique opportunities for us to improve our energy and utility profile positively, and assisted in forming the Capital Reinvestment Strategy currently in consideration presently.

I fully recommend the team at ECOsystems and the CEO process for any commercial property.

A handwritten signature in black ink, appearing to read "Jonathan Woodbridge Buys", is written over a horizontal line that spans the width of the page.
